

EDI (Electronic Data Interchange) Development

Are current data systems helping or hindering your growth?

*Enable data-flow that directly meets your unique needs.
Celerasys is the right system-engineering partner for growing companies.*

INTERFACE/INTEGRATION SERVICES

Integrating systems such as **SAP, i2, Oracle Solutions, Rockport, Vastera** in Fortune 500 companies, gives us the experience needed to incorporate modifications seamlessly. Regardless of the project, we focus on your needs with the future in mind. Whether it is system implementation, system upgrade or just improving data flow with you customers and vendors, the proper tools and components assure that your business remains fully operational!

- **Customs compliance**
- **Tracking and visibility**
- **Logistics**
- **Banking and financial institution interfacing (SWIFT)**
- **Quality control**
- **Data consolidation**

EDI DEVELOPMENT

The value of the EDI solution is really in the architecture and design of the individual transactions and the training of the resources to deal with data exceptions. We have the knowledge and the practical application experience, to make seamless EDI transmissions a strong asset within your business.

RETURN ON INVESTMENT

Efficiencies attained through system enhancements have saved Celerasys' clients hundreds of thousands of dollars. Spend 15 minutes with one of our engineers and we'll assess how much time and money we can save you.
